## REPEAT ENROLLMENTS IN COREQUISITE COURSES

The Board of Trustees and administration recognize the importance of successful completion of corequisite coursework in selected English and math courses.

For Financial Aid purposes, only 30 attempted corequisite credit hours can receive financial assistance. If the student needs to repeat any corequisite courses, financial aid can count these courses towards enrollment and award Title IV funds to a student who is repeating, for the first time only (i.e., one repetition per class) a previously passed course. For this purpose, passed means any grade higher than an "F", regardless of any school policy requiring a higher qualitative grade or measure to have been considered to have passed the course.

Prerequisite courses with a zero-number course prefix do not count toward graduation nor do they meet transfer requirements.
